In order to best meet your expectations, to facilitate the organization of your stay and to bring more to the inhabitants of the territory, we invite you to enter the sphere of the Connected Tourist Office!

In addition to our website and our presence on social networks, we are now at your service 24 hours a day through our touch screen terminal.

Simple, intuitive and practical, the touch screen terminal located at the entrance to the Tourist Office offers all the necessary information on the Saint-Lô Agglo destination.

Where to eat, where to sleep, the sites to visit, the calendar of outings? The terminal answers all these questions by also offering free services such as the weather forecast, sending electronic postcards and even the availability of our hôtels. will be displayed in high season.

## **Unlimited WiFi !!!**

Because we know that the internet is essential to your daily life, Saint-Lô Agglo is part of the departmental territorial wifi approach: MAOWI (supported by Manche Numérique).

You can therefore now connect to the Maowi network for free from the Tourist Office or from our tourist information office in Torigny-les-Villes.

In addition, in order to simplify your use and access to the internet, you only need to identify yourself, once only, during your first connection and you will be automatically recognized each time you come to a place covered by this network. Simple, right ???
